CON 2016

r2con 2016

--pancake

If you are here you probably know what radare is.

But… let me do a quick introduction to be sure that you didn't get confused and joined the wrong congress.

r2

Radare was born 10 years ago in Barcelona (first release in 2006 April 8th).

It started as a tiny hexadecimal editor for helping on forensics, but I made it grow to acquire disassembler, debugger and analysis super powers. Aiming to be a framework for helping on several reverse engineering tasks providing libraries, plugins, packages, tools and bindings.

I use it for my personal and professional needs, but always made everything free and opensource, having some sporadic contributions, until 4 years ago where the community grew pretty quickly and receives daily pull requests from a large number of users.

What

Seeing people and companies around the globe making presentations, patches, tools or just using r2 for their own purposes is motivating, so..

I thought that the best way to celebrate the 10th anniversary of the project would be organizing a congress around it.

This congress aims to be a meeting point for the hacker community with the nexus of radare, exposing topics from different fields like reverse engineering, development, exploiting, forensics, cracking, malware analysis, etc..

The Congress

Fill 3 days in a row

- Two tracks of trainings (thursday and friday morning)
- Day and a half of talks (friday afternoon and saturday)

Competitions

- ESIL support for AVR (win a Drone!)
- Hardware CTF (win an Arduino!)

Bonus Track

Welcome pack

- Congress t-shirt and bag
- LGPL license agreement
- radare2 cheatsheet

Dinner

- Will happen the first night (thursday) (today)

Thanks

Staff: *@shakethemalware, @blackhold, @virtualminds @trufae*

Collaborators: @pof @killabytenow @braincode

Speakers: this wouldn't be possible without you.

Music: @neuroflip

Community: <3

NowSecure: for supporting me in this adventure

AureaSocial: for this place

CamisetasFrikis & VerdeMenta: merchandising

HackerStrip: for the comics and poster design

LaPeiper: for the posters printed

One More Thing..

The GIT repo of the congress:

   https://github.com/radareorg/r2con

The Wireless password:

   r2conWifi

The breaks

   Ther will be one in the mid morning and another in the afternoon

Everything will be recorded and published after the congress on YouTube

- Yay!

Let's go!
